

AqBanking - Bug #2

Qt5 support

02/15/2018 11:13 PM - admin

Status: Closed	Start date:
Priority: Normal	Due date:
Category:	
Betriebssystem:	Anwendung:
AqBanking-Version:	Version der Anwendung:
Description There is Qt4 support mentioned in the documentation. Is that one outdated or the software?

Current versions of AqBanking are not tied to any frontend library. The user interface bindings are now all handled by Gwenhywfar.

Gwenhywfar supports Qt 5 since version 4.15.3.

So, I would consider this issue solved.

What documentation does this issue refer to?

Where do we need to update the documentation?
