

AqBanking - Bug #229

Aqbanking is picking up gwenhywfar's includedir variable

08.02.2021 23:13 - wrobelda

Status:	Closed	Beginn:	08.02.2021
Priorität:	High	Abgabedatum:	
Kategorie:		Anwendung:	KMyMoney
Betriebssystem:	MacOSX	Version der Anwendung:	
AqBanking-Version:	6.2.5		
Beschreibung As of cmake 3.19.4, aqbanking cmake is failing with: <pre>CMake Error at /opt/homebrew/lib/cmake/gwenhywfar-5.5/gwenhywfar-config.cmake:7 (message): File or directory /opt/homebrew/Cellar/gwenhywfar/5.5.0/include/aqbanking6 referenced by variable AQBANKING_INCLUDE_DIRS does not exist ! Call Stack (most recent call first): /opt/homebrew/lib/cmake/aqbanking-6.2/aqbanking-config.cmake:24 (set_and_check)</pre> This is because aqbanking-config.cmake does not declare own includedir, making cmake pick up gwenhywfar's. Adding missing set_and_check() to aqbanking-config.cmake fixes the issue. Feel free to pick the fix from my fork: https://github.com/wrobelda/aqbanking/commit/171dbecb9720b168282126dcf00e741d9b8e912a
