

## AqBanking - Bug #229

### Aqbanking is picking up gwenhywfar's includedir variable

#### Description

As of cmake 3.19.4, aqbanking cmake is failing with:

```
CMake Error at /opt/homebrew/lib/cmake/gwenhywfar-5.5/gwenhywfar-config.cmake:7 (message):  
  File or directory /opt/homebrew/Cellar/gwenhywfar/5.5.0/include/aqbanking6  
  referenced by variable AQBANKING_INCLUDE_DIRS does not exist !  
Call Stack (most recent call first):  
  /opt/homebrew/lib/cmake/aqbanking-6.2/aqbanking-config.cmake:24 (set_and_check)
```

This is because aqbanking-config.cmake does not declare own includedir, making cmake pick up gwenhywfar's. Adding missing set\_and\_check() to aqbanking-config.cmake fixes the issue.

Feel free to pick the fix from my fork:
