| <b>Beschreibung</b><br>Currently all GUI APIs restrict the import/export logic to GCC compiler only. This patch relaxes that for MSVC/clang-cl compiler as well, but it should be relaxed further to support regular (i.e. not clang-cl) clang as well — or simply to not impose any restrictions at all. |            |                               |            |
