Beschreibung			
Hallo zusammen, leider kann ich mit der neuesten Version v5.99.30.0beta keine Transaktionen mehr bei der Deutschen Bank mit HBCI Pin-Tan abholen, der "Balance" funktioniert allerdings. Mit der bisher genutzten Version 5.8.2 klappt beides einwandfrei. Hier ein Auszug aus dem Log: <pre>/opt/aqbanking/bin/aqbanking-cli request --transactions --ignoreUnsupported ===== Executing Jobs ===== AqBanking v5.99.30.0beta Sending jobs to the bank(s) Sorting commands by account Sorting commands by account Sorting commands by provider Send commands to providers Send commands to provider "aqhbc" 3:2019/09/20 13-12-11:aqbanking-cli(9451):provider_sendcmd.c: 115: Handling user "XXX" Locking users Locking customer "1" Executing HBCI jobs AqHBCI started TAN method (901) selected by user is no longer valid,please choose another one Selecting iTAN mode "Mobile-TAN" (901) Opening dialog Encoding queue ===== Enter PIN ===== Please enter the PIN for user XXX at Deutsche Bank Privat und Geschäftskunden Input: XXX Sending message Connecting to server... Historie

#1 - 20.09.2019 13:22 - olllee

Okay,

hab gerade den letzten Post von heute Nacht gelesen. Ich konnte das Problem ebenso fixen mit:

```
/opt/aqbanking/bin/aqhbci-tool4 getaccsepa -a X
```

Kann also geschlossen werden.

Danke und viele Grüße

Oliver
